

KYOCERA's AccuSender is a simple, secure way to send large scanned documents to multiple destinations via e-mail from select Kyocera MFPs.

EFFICIENTLY SCAN AND DISTRIBUTE LARGE FILES WITHOUT SIZE LIMITATIONS

In today's increasingly fast-paced business environment, factors such as mobility, cost savings, and the need for faster turnaround times have resulted in many businesses using digital solutions as the preferred method for sending documents to customers and co-workers. The e-mail size restrictions of many servers, however, has made sending large files difficult, requiring complicated and time-consuming ways to get them to their destination. Kyocera offers a simple solution to transform large hardcopy documents into digital files that can be sent quickly and easily, regardless of file size, using your existing Kyocera MFP.

Kyocera's AccuSender™ capture and distribution business application is a secure and reliable way to e-mail scanned documents of any size to multiple destinations. Utilizing either the file split function or the YouSendIt™ component, a leading third party provider of file transfer and collaboration services, and working directly from your existing Kyocera MFP, you simply scan your file, enter the destination(s), select e-mail and delivery options, and send your document. Recipients will receive an e-mail link to the file, which they can then download with a single click. With AccuSender, the process of sending large PDF files is seamless and secure. Take advantage of presets including cover page, delivery confirmation, setting of expiration dates on sent files, and file protection for added security. AccuSender, combined with YouSendIt, brings another level of versatility to your Kyocera MFP, while helping to maximize workflow efficiency across your business.

**WITH KYOCERA ACCUSENDER,
SENDING LARGE FILES
IS FAST AND EASY!**

1. Enter recipient(s) information from address book or via manual entry
2. Configure your sending preferences on the MFP's control panel
3. Scan and send your documents

It's that simple!

Multiple delivery option for users, based on preference

Users can choose between Barcode Sheets for automatic routing or simply enter the recipient's e-mail or fax destination

HyPAS™

Kyocera's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

THE BENEFITS OF KYOCERA ACCUSENDER

The AccuSender business application allows users to take advantage of the capabilities of Kyocera HyPAS-enabled MFPs to scan and e-mail large files, eliminating concerns over their server's file size limitations.

- Scan and e-mail large documents without restrictive e-mail server size limitations
- Password protect files to ensure document security and compliance
- Barcode routing sheets allow sending to multiple destinations quickly in one batch
- Document stamping - including Bates stamping - addresses compliance requirements
- Send option allows you to choose between an LDAP lookup, recent e-mail, fax destinations or send to self
- Delivery confirmation via e-mail ensures receipt of scanned document
- Conveniently add cover pages at the control panel
- Utilize existing corporate or individual YouSendIt accounts, whether Lite, Pro or Pro Plus
- Protect critical information through document retention, storage and destruction scheduling

To mitigate risk and ensure compliance, AccuSender offers multiple standard document security options

AccuSender's preset options provide users with a quick and efficient way to apply document delivery settings prior to transmission
