The Samsung SUR40 for Microsoft Surface
brings people together to connect, learn,
and decide using touch and everyday objects

Experiences that enhance collaboration and personal connections

Microsoft® Surface® brings people together to connect, learn, and decide. This experience comes to life in the next generation device – the Samsung SUR40 for Microsoft Surface.

- Horizontal or vertical deployment
- Large form factor for simultaneous interaction
- Use everyday objects without the use of cameras
- Durable design for public use
- Rich partner network of solution providers

Technology that sees and responds to people and objects

SUR40 uses Microsoft PixelSense™ technology to see and respond to touch and objects providing

- High accuracy touch interaction from multiple people at the same time
- Optical tag recognition
- Sees more than 50 points of contacts

SUR40 technology features include:

- High definition 40" LCD screen
- Slim four inch profile, making it easy to use in a horizontal deployment, or embed in walls or custom enclosures.
- Supports VESA mounting for vertical deployment
- Standard legs available or a customer can design and attach their own

Proven platforms, tools and innovation

SUR40 hardware is powered by Microsoft's Windows 7 and a powerful embedded system

- AMD powered CPU and GPU for high performance
- Windows 7 manageability features for enterprise deployment ease
- DASH manageability system for remote diagnostics
- Familiar Microsoft developer tools and a worldwide set of solution providers found on www.surface.com
